MTN EASY ACCOUNTING

What is it?

- This is an online accounting tool for business management and easy accounting for small business owners
- It gives entrepreneurs with no accounting knowledge or training, the ability to perform crucial finance and related business tasks.

Why adopt it as an accountant?

The cloud-based solution features essential capabilities such as:

- quoting and invoicing,
- complete money management,
- customer communication,
- simple reporting ,
- accountant dashboard.
- Permanent online records with unlimited space.

Easy System Setup

- Your Company Profile allows you to capture all the information relating to your company including name, trading name and registered date, company contact details, tax information, bank account details and your quoting/invoicing numbering system.

Contacts Management

- Easy online access to your business contacts from anywhere at any time.

Money Management (Transactions)

- Easy quote and invoice generation with company logo
- Can import bank statements from all major banks and select relevant income or expense item from easy drop down menu (no accounting terminology used)

Staff Payroll

- Easy capturing and storage of all staff information.
- MTN Easy Accounting makes KRA TAX compliance easy.

Business Owner Reporting

- Simple reports that the business owner understands
- You can see who you owe or who owes you at the push of a button
- Simple VAT report giving you your figures for KRA returns

The Accountant dashboard is primarily for your accountant's use

- MTN EasyAccounting saves you money on bookkeeping as you are now able to enter your slips in a way you easily understand business and the system then gives the information to your accountant in the way they need to receive it.
- It gives your accountant all the information they need to generate your Annual Financial Statements and Monthly Management Accounts
- Can export your General Ledger, Trial Balance, Income Statement and Balance Sheet information in CSV format; which can then be imported by them into whichever large accounting system they use in their office to generate Financial Statement packs

Welcome To The New World of Business
