TYPE 1
"intitle:index of" bookname author pdf
e.g "intitle:index of" a time to kill john grisham pdf

This will show you index of pages (a usual misconfiguration in peoples
servers) and index pages are the ones with many slashes / / /
Same goes for music.Say I am looking for Eminems song fast lane
"intitle:index of" eminem fastlane mp3
Clicking on the first link will show you all the music there and if you
click on PARENT DIRECTORY,Bingo you will see a lot more

TYPE 2
site:com filetype:pdf type of information
e.g site:com filetype:pdf Strategic management

The above code is for more general search from journals to publications.
Every result you will that has pdf beside is a pdf document.
This means you can change the filetype to doc --- filetype:doc

TYPE 3
+("index of") +("/ebooks"|"/book") +(chm|pdf|zip|rar) +bookname
e.g +("index of") +("/ebooks"|"/book") +(chm|pdf|zip|rar) +ISO27001

This is one of the most powerful because it search for other file formats
such as chm or bigger books that come in the form of pdf or even compressed.
You can add epub to the query
