CS/	
ANNUAL REPORT AND FINANCIAL STATEMENTS	IAS1. p51
FOR THE YEAR ENDED 31 DECEMBER 2019	IAS1. p51

INTRODUCTORY NOTES

This specimen provides an illustrative set of financial statements prepared in accordance with International Financial Reporting Standards and the reporting requirements of the Sacco Societies Act No. 14 of 2008 for accounting periods beginning on or after 1 January 2019. The presentation format is not the only acceptable form of presentation and alternative presentations may be acceptable provided that they comply with the presentation and disclosure requirements of IFRS.

The specimen is intended as guidance for members of ICPAK and is not a substitute for reading the standards and interpretations themselves or for professional judgement. Whenever necessary, reference to International Financial Reporting Standards should be made.

This specimen was updated using the edition containing the IFRS Standards, as approved by the International Accounting Standards Board for issue up to 31 December 2018, that are required to be applied for accounting periods beginning 1 January 2019 but without early adoption of prospective standards.

Policies and disclosures not applicable to this specimen draft:

- IAS 20 'Accounting for Government Grants and Disclosure of Government Assistance'
- IAS 26 'Accounting and Reporting by Retirement Benefit Plans'
- IAS 28 'Investments in Associates and Joint Ventures'
- IAS 29 'Financial Reporting in Hyperinflationary Economies'
- IAS 33 'Earnings per Share'
- IAS 34 'Interim Financial Reporting'
- IAS 37 'Provisions, Contingent Liabilities and Contingent Assets'
- IAS 41 'Agriculture'
- IFRS 1 'First time Adoption of International Financial Reporting Standards'
- IFRS 2 'Share- based payments'
- IFRS 3 'Business Combinations'
- IFRS 4 'Insurance Contracts'
- IFRS 5 'Non Current Assets held-for-sale and Discontinued Operations'
- IFRS 6 'Exploration for and Evaluation of Mineral Resources'
- IFRS 9 'Financial Instruments: Disclosures' in respect of derivatives and hedge accounting
- IFRS 8 'Segmental reporting'
- IFRS 10 'Consolidated Financial Statements'
- IFRS 11 'Joint Arrangements'
- IFRS 12 'Disclosure of Interests in Other Entities'
- IFRS 14 'Regulatory Deferral Accounts'
- IFRS 16 'Leases' in respect of sale and lease-back transactions and lessor accounting for finance leases
- Disclosures related to amendments to IAS 16 and IAS 41 'Biological assets' and the application thereof.
- IFRS 17 'Insurance contracts'

STATEMENT OF DIRECTORS' RESPONSIBILITIES

The Sacco Societies Act No. 14 of 2008 requires the directors to ensure that the management maintains proper and accurate records that reflect the true and fair position of the society's financial condition, establish adequate and effective internal control systems and policies, safeguard the assets of the society and take reasonable steps for the prevention and detection of fraud and other irregularities. The directors are also responsible for the production of annual audited financial statements.

The directors accept responsibility for the preparation and fair presentation of these financial statements in accordance with the International Financial Reporting Standards and in the manner required by the Sacco Societies Act No. 14 of 2008. They also accept responsibility for:

- Designing, implementing and maintaining such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error;
- ii. Selecting and applying appropriate accounting policies; and
- iii. Making accounting estimates and judgements that are reasonable in the circumstances.

The directors are of the opinion that the financial statements give a true and fair view of the financial position of the society as at 31 December 2019 and of the society's financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards and the requirements of the Sacco Societies Act No. 14 of 2008.

In preparing these financial statements the directors have assessed the society's ability to continue as a going concern. Nothing has come to the attention of the directors to indicate that the society will not remain a going concern for at least the next twelve months from the date of this statement.

The directors acknowledge that the independent audit of the financial statements does not relieve them of their responsibilities.

Approved by the board of directors on		2020 and signed on its behalf by:

REPORT OF THE INDEPENDENT AUDITOR TO THE MEMBERS OF MPKOPO SAVINGS AND CREDIT CO-OPERATIVE SOCIETY LIMITED

Opinion

We have audited the financial statements of Mkopo Savings and Credit Co-operative Society Limited (the society) set out on pages 9 to 78, which comprise the statement of financial position as at 31 December 2019, the statement of profit or loss and other comprehensive income, the statement of changes in equity, the statement of cash flows for the year then ended and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the society's financial position as at 31 December 2019, and of its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards and the Sacco Societies Act No. 14 of 2008.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing. Our responsibilities under those standards are further described in the auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the society in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in Kenya, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

(N/B Edit if the opinion is not unmodified)

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

REPORT OF THE INDEPENDENT AUDITOR TO THE MEMBERS OF MKOPO SAVINGS AND CREDIT CO-OPERATIVE SOCIETY LIMITED (CONTINUED)

Other information

The directors are responsible for the other information. The other information comprises the report of the directors and financial and statistical information which we obtained prior to the date of this auditor's report, and the [chairman's report, supervisory committee report, sustainability report and corporate social investment report] which are expected to be made available to us after that date.

Our opinion on the financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this report of the independent auditor, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

When we read the other reports expected to be made to us after date of report of the independent auditor, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

Responsibilities of directors for the financial statements

The directors are responsible for the preparation of the financial statements that give a true and fair view in accordance with International Financial Reporting Standards and the requirements of the Sacco Societies Act No. 14 of 2008, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. In preparing the financial statements, the directors are responsible for assessing the society's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the society or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of independent auditor that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with International Standards on Auditing, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

Identify and assess the risks of material misstatement of the financial statements, whether due to fraud
or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that
is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material
misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve
collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

REPORT OF THE INDEPENDENT AUDITOR TO THE MEMBERS OF MKOPO SAVINGS AND CREDIT CO-OPERATIVE SOCIETY LIMITED (CONTINUED)

Auditor's responsibilities for the audit of the financial statements (continued)

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that
 are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness
 of the society's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the society's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the independent auditor to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the independent auditor. However, future events or conditions may cause the society to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements for the current period and are therefore the key audit matters. We describe these matters in our report of the independent auditor unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

NOTE: PSC TO DISCUSS REQUIREMENTS UNDER S56 OF THE SACCO SOCIETIES ACT, AND IN PARTICULAR S56(D) WHICH IS AN ATTESTATION OF INTERNAL CONTROLS.

New standards, amendments and interpretations adopted by the society (continued)

IAS 8.p28

International Financial Reporting Standard 16 (IFRS 16): Leases

From 1 January 2019, to comply with IFRS 16, Leases, which replaced IAS 17, Leases, the society now recognises lease liabilities relating to leases under which the society is the lessee that had previously been classified as operating leases (other than leases with less than 12 months to run from 1 January 2019 and leases of low value items). Such liabilities have been measured at 1 January 2019 at the present value of the remaining lease payments discounted using the society's incremental borrowing rate as at 1 January 2019. Corresponding right-of-use assets have been recognised, measured as if the society's new accounting policy (see Note 1 (p)) had been applied since the commencement of each lease but discounted using the society's incremental borrowing rate as at 1 January 2019. The difference between the lease liabilities and right-of-use assets at 1 January 2019 has been recognised as an adjustment to retained earnings at that date.

As permitted by the transition provisions in the new standard, comparative amounts have not been restated. The society's accounting policy for leases under which the society was lessee was, up to 31 December 2018, as follows:

Leases of property, plant and equipment including hire purchase contracts where the society assumes substantially all the risks and rewards incidental to ownership are classified as finance leases. Finance leases are recognised as a liability at the inception of the lease at the lower of the fair value of the leased assets and the present value of the minimum lease payments. The interest rate implicit in the lease is used as the discount factor in determining the present value. Each lease Property, plant and equipment acquired under finance leases are capitalised and depreciated over the estimated useful life of the asset.

Leases of assets where a significant proportion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases are charged to the profit or loss on a straight-line basis over the lease period. Prepaid operating lease rentals are recognised as assets and are subsequently amortised over the lease period.

The measurement of assets and liabilities that were recognised as finance leases under the previous accounting policy has continued unchanged, but the assets have been reclassified from Property, plant and equipment to Right-of-use assets (see Notes 13 and 12). Right-of-use assets and lease liabilities in respect of operating leases (excluding leases with a term, on commencement, of 12 months or less and leases for which the underlying asset is of low value) in force at 1 January 2019 have been recognised in accordance with the transition requirements of IFRS 16, as described above.

The resulting adjustment passed at 1 January 2019 as a result of applying IFRS 16, was as follows:

Shs.

IFRS16.C11

IFRS16.C8

Lease liabilities

Right-of-use assets

Deferred tax

Net adjustment to retained earnings at 1 January 2019

- 1. Significant accounting policies (continued)
- a) Basis of preparation (continued)

New standards, amendments and interpretations adopted by the society (continued)

IAS 8.p28

Other standards and amendments

The following, which became effective from 1 January 2019, have been adopted but have not had a significant impact on the society's financial statements.

- Amendments to IAS 12 'Income Taxes' effective for annual periods beginning on or after 1 January 2019 clarifying on the recognition of income tax consequences of dividends.
- Amendments to IAS 19 'Employee Benefits' effective for annual periods beginning on or after 1 January 2019 clarifying the effects of a retirement benefit plan amendment, curtailment or settlement.
- Amendments to IAS 23 'Borrowing Costs' effective for annual periods beginning on or after 1 January 2019 clarifying that specific borrowings remaining unpaid at the time the related asset is ready for its intended use or sale will comprise general borrowings.
- Amendments to IAS 28 'Investments in Associates and Joint Ventures' effective for annual periods beginning on or after 1 January 2019 clarifying that IFRS 9 is only applicable to investments to which the equity method is not applied.
- Amendments to IFRS 3 'Business Combinations' and IFRS 11 'Joint Arrangements' effective for annual periods beginning on or after 1 January 2019 in relation to remeasurement of previously held interests on a joint operation on obtaining control.
- Amendments to IFRS 9 'Financial Instruments' effective for annual periods beginning on or after 1 January 2019 clarifying that the existence of prepayment features with negative compensation will not in itself cause the instrument to fail the amostised cost classification.
- Amendments to IFRS 11 'Joint Arrangements' effective for annual periods beginning on or after 1 January 2019, clarify that when an entity obtains joint control of a business that is a joint operation, it does not remeasure its previously held interests.
- IFRIC 23 'Uncertainty over Income Tax Treatments' (issued June 2017) effective for annual periods beginning on or after 1 January 2019 clarifies the accounting for uncertainties in income taxes.

New standards, amendments and interpretations issued but not effective

At the date of authorisation of these financial statements the following standards and interpretations which, have not been applied in these financial statements, were in issue but not yet effective for the year presented:

- Amendments to IFRS 10 and IAS 28 'Sale or Contribution of Assets between an Investor and its Associate or Joint Venture' (issued in September 2014) applicable from a date yet to be determined, address a current conflict between the two standards and clarify that a gain or loss should be recognized fully when the transaction involves a business, and partially if it involves assets that do not constitute a business.
- IFRS 17 'Insurance Contracts' (issued in May 2017) effective for annual periods beginning on or after 1 January 2021 establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts issued. It also requires similar principles to be applied to reinsurance contracts held and investment contracts with discretionary participation features issued. The objective is to ensure that entities provide relevant information in a way that faithfully represents those contracts. The society does not issue insurance contracts.

- 1. Significant accounting policies (continued)
- a) Basis of preparation (continued)

New standards, amendments and interpretations issued but not effective (continued)

IAS8.p28

- Amendments to IFRS 3 'Definition of a Business' (issued in October 2018) applicable to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after 1 January 2020 and to asset acquisitions that occur on or after the beginning of that period, clarify the definition of a business, with the objective of assisting entities to determine whether a transaction should be accounted for as a business combination or as an asset acquisition.
- Amendments to IAS 1 and IAS 8 'Definition of Material' (issued in October 2018) applicable to annual periods beginning on or after 1 January 2020, clarify the definition of material and how it should be applied by including in the definition guidance that previously featured elsewhere in IFRS.

The directors do not expect that adoption of these standards and interpretations will have a material impact on the financial statements in future periods. The society plans to apply the changes above from their effective dates.

b) Critical accounting estimates and judgement

IAS1.p125

In the application of the accounting policies, the directors are required to make judgements, estimates and assumptions about the carrying amount of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other relevant factors. Such estimates and assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised prospectively.

The directors have made the following assumptions that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

- Measurement of expected credit losses (ECL):

IFRS9.p5

The measurement of the expected credit loss allowance for financial assets measured at amortised cost and FVTOCI is an area that requires the use of complex models and significant assumption about future economic conditions and credit behaviour.

A number of significant judgements are also required in applying the accounting requirements for measuring ECL, such as:

- Determining criteria for significant increase in credit risk;
- Choosing appropriate models and assumptions for the measurement of ECL;
- Establishing the number and relative weightings of forward-looking scenarios for each type of product/market and associated ECL; and
- Establishing groups of similar financial assets for the purposes of measuring ECL.

ECLs are measured as the probability-weighted present value of expected cash shortfalls over the remaining expected life of the financial instrument.

The measurement of ECLs are based primarily on the product of the instrument's Probability of Default (PD), Loss Given Default (LGD), and Exposure At Default (EAD).

The ECL model applied for financial assets contains a three-stage approach that is based on the change in the credit quality of assets since initial recognition.

IAS1.p10

- 1. Significant accounting policies (continued)
- b) Key sources of estimation uncertainty

IAS1.p125

- Measurement of Expected Credit Losses (ECL) (continued):

IFRS9.p5

- Stage 1 If, at the reporting date, the credit risk of non-impaired financial instruments has not increased significantly since initial recognition, these financial instruments are classified in Stage 1, and a loss allowance that is measured, at each reporting date, at an amount equal to 12-month expected credit losses is recorded.
- Stage 2 When there is a significant increase in credit risk since initial recognition, these non-impaired financial instruments are migrated to Stage 2, and a loss allowance that is measured, at each reporting date, at an amount equal to lifetime expected credit losses is recorded. In subsequent reporting periods, if the credit risk of the financial instrument improves such that there is no longer a significant increase in credit risk since initial recognition, the ECL model requires reverting to recognition of 12-month expected credit losses.
- When one or more events that have a detrimental impact on the estimated future cash flows
 of a financial asset have occurred, the financial asset is considered credit-impaired and is
 migrated to Stage 3, and an allowance equal to lifetime expected losses continues to be
 recorded or the financial asset is written off.

Assessment of significant increase in credit risk: The determination of a significant increase in credit risk takes into account many different factors including a comparison of a financial instruments credit risk or PD at the reporting date and the credit or PD at the date of initial recognition. IFRS 9 however includes rebuttable presumptions that contractual payments that are overdue by more than 30 days will represent a significant increase in credit risk (stage 2) and contractual payments that are more than 90 days overdue will represent credit impairment (stage 3). The society uses these guidelines in determining the staging of its financial assets unless there is persuasive evidence available to rebut these presumptions.

 Useful lives and residual values of property, plant and equipment, intangible assets and right-of-use assets

Management reviews the useful lives and residual values of the items of property, plant and equipment, intangible assets and right-of-use assets on a regular basis. During the financial year, the directors determined no significant changes in the useful lives and residual values.

- Accounting for leases under IFRS 16

Management has made various judgements and estimates under IFRS 16 as detailed below:

Incremental borrowing rate: To determine the incremental borrowing rate, the society:

- where possible, uses recent third-party financing received as a starting point, adjusted to reflect changes in financing conditions since third party financing was received:
- uses a build-up approach that starts with a risk-free interest rate adjusted for credit risk, which does not have recent third party financing;
- makes adjustments specific to the lease, e.g., term, country, currency and security.

ii	the lease. Dividend is recognised when the right to receive income is established.	
e) F	Property and equipment	
le	All property and equipment is initially recorded at cost and thereafter stated at historical cost ess depreciation (except as stated below). Historical cost comprises expenditure initially incurred to bring the asset to its location and condition ready for its intended use.	IAS16.p73(a)
	reehold and leasehold land and buildings are subsequently shown at market value, based on periodic valuations less subsequent depreciation.	IAS16.p73(a)
n	Revaluations are performed with sufficient regularity such that the carrying amounts do not differ naterially from those that would be determined using fair values at the end of each reporting period.	
	Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset, and the net amount is restated to the revalued amount of the asset.	
ir re th a E a	increases in the carrying amount arising on revaluation are credited to other comprehensive income except to the extent that it reverses a revaluation decrease for the same asset previously ecognised in profit or loss, in which case the increase is credited to profit or loss to the extent of the decrease previously expensed. Decreases that offset previous increases of the same asset are charged to other comprehensive income; all other decreases are charged to profit or loss. Each year the difference between depreciation based on the revalued carrying amount of the asset (the depreciation charged to profit or loss) and depreciation based on the asset's original toost is transferred from the retained earnings to revaluation reserve.	IAS16.p39, 40,41
a it re	Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the tem will flow to the society and the cost can be reliably measured. The carrying amount of the eplaced part is derecognised. All other repairs and maintenance are charged to profit or loss luring the financial year in which they are incurred.	IAS16.p12
F	reehold land is not depreciated.	
ti	Depreciation on all other assets is calculated on the reducing balance basis [or straight line if hat applies] method to write down the cost of each asset, or the revalued amount, to its residual ralue over its estimated useful life using the following annual rates:	IAS16.p73(c)
N F	Rate % Buildings Motor vehicles Furniture and fittings Office equipment Computer equipment	IAS16.p73(c)

1. Significant accounting policies (continued)

e) Property and equipment (continued)

The assets residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

IAS16.p51

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

IAS36.p59

Gains and losses on disposal of property and equipment are determined by comparing the proceeds with the carrying amount and are taken into account in determining operating profit/loss. On disposal of revalued assets, amounts in the revaluation reserve relating to that asset are transferred to retained earnings in the statement of changes in equity.

IAS16.p68,71

f) Investment property

Fair value model:

Investment property is property held to earn rentals or for capital appreciation or both. Investment property, which can include right-of-use assets, is initially recognised at cost including the transaction costs. Subsequently, investment property is carried at fair value representing the open market value at the balance sheet date determined by annual valuations carried out by external registered valuers/directors (Level xx). Gains or losses arising from changes in the fair value are included in determining the profit or loss for the year to which they relate.

IAS40.p5/20/ 33/35

Subsequent expenditure on investment property where such expenditure increases the future economic value in excess of the original assessed standard of performance is added to the carrying amount of the investment property. All other expenditure is recognised as an expense in the year which it is incurred.

Gains and losses on disposal of investment property is determined by reference to their carrying amount and are taken into account in determining operating profit/(loss).

OR

Cost model:

Investment property is property held to earn rentals or for capital appreciation or both. Investment property, which can include right-of-use assets, is initially recognised at cost including the transaction costs. It is subsequently carried at cost less accumulated depreciation and accumulated impairment losses.

IAS40.p6,56, 69

Depreciation is calculated using the straight line method to write down the cost of the property to its residual value over its estimated useful life using the following annual rates:

Freehold land Nil
Leasehold land Lease period
Buildings 2

Subsequent expenditure on investment property where such expenditure increases the future economic value in excess of the original assessed standard of performance is added to the carrying amount of the investment property. All other expenditure is recognised as an expense in the year which it is incurred.

The properties residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

The properties carrying amounts are written down immediately to their recoverable amount if the carrying amount is greater than their estimated recoverable amount.

Gains and losses on disposal of investment property are determined by reference to their carrying amount and are taken into account in determining operating profit/(loss).

Right-of-use asset that meet the definition of investment property shall not be presented separately from investment property in the statement of financial position.

IFRS 16.p48

	nnual report and financial statements	
	or the year ended 31 December 2019	1
NC	OTES (CONTINUED)	
1.	Significant accounting policies (continued)	
g)	Intangible assets	
	Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.	
	Computer software	
	Computer software licenses are capitalised on the basis of the costs incurred to acquire and bring to use the specific software. These costs are amortised over their estimated useful lives which are estimated to be years. (State how many years the asset is amortised over).	IAS38.p118(a), (b) IAS38.p4
	Costs associated with developing or maintaining computer software programmes are recognised as an expense as incurred. Costs that are directly associated with the production of identifiable and unique software products controlled by the society, and that will probably generate economic benefits exceeding costs beyond one year, are recognised as intangible assets. Direct costs include software development staff costs and an appropriate portion of relevant overheads.	
	Computer software development costs recognised as assets are amortised over their estimated useful live which is estimated to be years.	IAS38.p68,71 IAS38.p118(a), (b)
	In the case that a company has development costs refer to IAS 38 para 57)	(-)
h)	Impairment of non-financial assets and intangible assets	
	At the end of each reporting period, the society reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any).	
	Assets that have an indefinite useful life are not subject to amortisation and are tested for impairment annually.	IAS36.p9,10
	An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units).	
	Non-financial assets that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.	
i)	Financial instruments	IFRS7.p21
	Financial assets and financial liabilities are recognised when the society becomes a party to the contractual provisions of the instrument. Management determines all classification of financial	

- Financial assets

instruments at initial recognition.

Financial assets are initially recognised at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. Financial assets carried at fair value through profit or loss are initially recognised at fair value and transaction costs are expensed in profit or loss.

IFRS9.p4.1.2

- 1. Significant accounting policies (continued)
- i) Financial Instruments (continued)

IFRS7.p21

- Financial assets (continued)

IFRS7.p21

The society's financial assets fall into the following categories:

Amortised cost: Financial assets that are held for collection of contractual cash flows where those cash flows represent Solely Payments of Principal and Interest (SPPI), and that the are not designated at Fair Value Through Profit or Loss (FVTPL), are measured at amortised cost. The carrying amount of these assets is adjusted by any expected credit loss allowance recognised and measured. Interest income from these financial assets is included in 'interest and similar income' using the effective interest rate method.

IFRS9.p4.1.2

Fair Value Through Other Comprehensive Income (FVTOCI): Financial assets that are held for collection of contractual cash flows where these cash flows comprise SPPI and also for liquidating the assets depending on liquidity needs and that are not designated at FVTPL, are measured at FVTOCI. Movements in the carrying amount are taken through OCI, except for recognition of impairment gain or losses, interest revenue and foreign exchange gain and losses. Gains and losses previously recognised in OCI are reclassified from equity to profit or loss on disposal of such instruments. Gains and losses related to equity instruments are not reclassified.

IFRS9.p4.1.2A

Fair Value Through Profit or Loss (FVTPL): Financial assets that do not meet the criteria for amortised cost or FVTOCI are measured at FVTPL. A gain or loss on a debt investment that is subsequently measure at fair value through profit or loss and is not part of a hedging relationship is recognised in profit or loss and presented in the profit or loss statement.

IFRS9.p4.1.4

For the purpose of SPPI the test, principal is the fair value of the financial asset at initial recognition. That principal amount may change over the life of the financial asset (e.g. if there are repayments of principal). Interest consists of consideration for the time value of money, for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs, as well as a profit margin. The SPPI assessment is made in the currency in which the financial asset is denominated.

Contractual cash flows that are SPPI are consistent with a basic lending arrangement. Contractual terms that introduce exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement will not comprise SPPI.

An assessment of business models for managing financial assets is fundamental to the classification of a financial asset. The society determines the business models at a level that reflects how societies financial assets are managed together to achieve a particular business objective. The society's business model does not depend on management's intentions for an individual instrument, therefore the business model assessment is performed at a higher level of aggregation rather than on an instrument-by-instrument basis.

The society has more than one business model for managing its financial instruments which reflect how the society manages its financial assets in order to generate cash flows. The society's business models determine whether cash flows will result from collecting contractual cash flows, selling financial assets or both.

The society considers all relevant information available when making the business model assessment. However, this assessment is not performed on the basis of scenarios that the society does not reasonably expect to occur, such as so-called 'worst case' or 'stress case' scenarios. The society takes into account all relevant evidence available such as:

- 1. Significant accounting policies (continued)
- i) Financial instruments (continued)

IFRS7.p21

IFRS7.p21

- Financial assets (continued)

- how the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way in which those risks are managed; and
- how managers of the business are compensated (e.g. whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected).

At initial recognition of a financial asset, the society determines whether newly recognised financial assets are part of an existing business model or whether they reflect the commencement of a new business model. The society reassess its business models each reporting period to determine whether the business models have changed since the preceding period. For the current and prior reporting period the society has not identified a change in its business models.

When a debt instrument measured at FVTOCI is derecognised, the cumulative gain/loss previously recognised in OCI is reclassified from equity to profit or loss. In contrast, for an equity investment designated as measured at FVTOCI, the cumulative gain/loss previously recognised in OCI is not subsequently reclassified to profit or loss but transferred within equity.

Financial instruments that are subsequently measured at amortised cost or at FVTOCI are subject to impairment.

Impairment

IFRS7.p35F, IFRS9.p5.5.1

The society recognises loss allowances for ECLs on the following financial instruments that are not measured at FVTPL:

- Cash and cash equivalents
- Loans and advances
- Other financial assets

No impairment loss is recognised on investments measured at FVTPL.

ECLs are required to be measured through a loss allowance at an amount equal to:

- 12-month expected credit loss (ECL), i.e. lifetime ECL that result from those default events on the financial instrument that are possible within 12 months after the reporting date, (referred to as Stage 1); or
- full lifetime ECL, i.e. lifetime ECL that result from all possible default events over the life of the financial instrument. (referred to as Stage 2 and Stage 3).

A loss allowance for full lifetime ECL is required for a financial instrument if the credit risk on that financial instrument has increased significantly since initial recognition. For all other financial instruments, ECLs are measured at an amount equal to the 12-month ECL. More details on the determination of a significant increase in credit risk are provided in note 28.

Mkopo Savings and Credit Co-operative Society Limited - CS/ Annual report and financial statements For the year ended 31 December 2019 NOTES (CONTINUED)	
Significant accounting policies (continued)	
i) Financial instruments (continued)	
- Financial assets (continued)	IFRS7.p21
Impairment (continued)	IFRS7.p35F,
ECLs are a probability-weighted estimate of the present value of credit losses. These are measured as the present value of the difference between the cash flows due to the society under the contract and the cash flows that the society expects to receive arising from the weighting of multiple future economic scenarios, discounted at the asset's EIR.	IFRS9.p5.5.1
For undrawn loan commitments, the ECL is the difference between the present value of the difference between the contractual cash flows that are due to the society if the holder of the commitment draws down the loan and the cash flows that the society expects to receive if the loan is drawn down.	
For financial guarantee contracts, the ECL is the difference between the expected payments to reimburse the holder of the guaranteed debt instrument less any amounts that the society expects to receive from the holder, the debtor or any other party.	
The society measures ECL on an individual basis, or on a collective basis for portfolios of loans that share similar economic risk characteristics. The measurement of the loss allowance is based on the present value of the asset's expected cash flows using the asset's original effective interest rate (EIR), regardless of whether it is measured on an individual basis or a collective basis.	
More information on measurement of ECLs is provided in note 28 (b), including details on how instruments are grouped when they are assessed on a collective basis.	
A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Credit-impaired financial assets are referred to as Stage 3 assets. Evidence of credit-impairment includes observable data about the following events:	
 contractual payments that are more than 90 days overdue; significant financial difficulty of the borrower or issuer; a breach of contract such as a default or past due event; the lender of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession that the lender would not otherwise consider; 	

- otherwise consider:
- the disappearance of an active market for a security because of financial difficulties; or
- the purchase of a financial asset at a deep discount that reflects the incurred credit losses.

It may not be possible to identify a single discrete event, instead, the combined effect of several events may have caused financial assets to become credit-impaired. The society assesses whether all new and revised standards and interpretations that have become effective for the first time credit-impaired at each reporting date. To assess if sovereign and corporate debt instruments are credit impaired, the society considers factors such as bond yields, credit ratings and the ability of the borrower to raise funding.

Modification and derecognition of financial assets

IFRS9.p32.3

A modification of a financial asset occurs when the contractual terms governing the cash flows of a financial asset are renegotiated or otherwise modified between initial recognition and maturity of the financial asset. A modification affects the amount and/or timing of the contractual cash flows either immediately or at a future date. In addition, the introduction or adjustment of existing covenants of an existing loan would constitute a modification even if these new or adjusted covenants do not yet affect the cash flows immediately but may affect the cash flows depending on whether the covenant is or is not met (e.g. a change to the increase in the interest rate that arises when covenants are breached).

- 1. Significant accounting policies (continued)
- i) Financial instruments (continued)
 - Financial assets (continued)

Modification and derecognition of financial assets (continued)

IFRS9.p32.3

The society renegotiates loans to customers in financial difficulty to maximise collection and minimise the risk of default. A loan forbearance is granted in cases where although the borrower made all reasonable efforts to pay under the original contractual terms, there is a high risk of default or default has already happened and the borrower is expected to be able to meet the revised terms. The revised terms in most of the cases include an extension of the maturity of the loan, changes to the timing of the cash flows of the loan (principal and interest repayment), reduction in the amount of cash flows due (principal and interest forgiveness) and amendments to covenants. The society has an established forbearance policy which applies for corporate and retail lending.

When a financial asset is modified, the society assesses whether this modification results in derecognition. In accordance with the society's policy a modification results in derecognition when it gives rise to substantially different terms. To determine if the modified terms are substantially different from the original contractual terms the society considers the following:

- Qualitative factors, such as contractual cash flows after modification are no longer SPPI, change in currency or change of counterparty, the extent of change in interest rates, maturity, covenants. If these do not clearly indicate a substantial modification, then;
- A quantitative assessment is performed to compare the present value of the remaining contractual cash flows under the original terms with the contractual cash flows under the revised terms, both amounts discounted at the original effective interest.

If the difference in present value is greater than 10% the society deems the arrangement is substantially different leading to derecognition.

In the case where the financial asset is derecognised, the loss allowance for ECL is remeasured at the date of derecognition to determine the net carrying amount of the asset at that date. The difference between this revised carrying amount and the fair value of the new financial asset with the new terms will lead to a gain or loss on derecognition. The new financial asset will have a loss allowance measured based on 12-month ECL except in the rare occasions where the new loan is considered to be originated - credit impaired. This applies only in the case where the fair value of the new loan is recognised at a significant discount to its revised par amount because there remains a high risk of default which has not been reduced by the modification. The society monitors credit risk of modified financial assets by evaluating qualitative and quantitative information, such as if the borrower is in past due status under the new terms.

When the contractual terms of a financial asset are modified and the modification does not result in derecognition, the society determines if the financial asset's credit risk has increased significantly since initial recognition by comparing:

- the remaining lifetime PD estimated based on data at initial recognition and the original contractual terms; with
- the remaining lifetime PD at the reporting date based on the modified terms.

- 1. Significant accounting policies (continued)
- i) Financial instruments (continued)
 - Financial assets (continued)

Modification and derecognition of financial assets (continued)

IFRS9.p32.3

For financial assets modified as part of the society's forbearance policy, where modification did not result in derecognition, the estimate of PD reflects the society's ability to collect the modified cash flows taking into account the society's previous experience of similar forbearance action, as well as various behavioural indicators, including the borrower's payment performance against the modified contractual terms. If the credit risk remains significantly higher than what was expected at initial recognition the loss allowance will continue to be measured at an amount equal to lifetime ECL. The loss allowance on forborne loans will generally only be measured based on 12-month ECL when there is evidence of the borrower's improved repayment behaviour following modification leading to a reversal of the previous significant increase in credit risk.

Where a modification does not lead to derecognition the society calculates the modification gain/loss comparing the gross carrying amount before and after the modification (excluding the ECL allowance). Then the society measures ECL for the modified asset, where the expected cash flows arising from the modified financial asset are included in calculating the expected cash shortfalls from the original asset.

The society derecognises a financial asset only when the contractual rights to the asset's cash flows expire (including expiry arising from a modification with substantially different terms), or when the financial asset and substantially all the risks and rewards of ownership of the asset are transferred to another entity. If the society neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the society recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the society retains substantially all the risks and rewards of ownership of a transferred financial asset, the society continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain/loss that had been recognised in OCI and accumulated in equity is recognised in profit or loss, with the exception of equity investment designated as measured at FVTOCI, where the cumulative gain/loss previously recognised in OCI is not subsequently reclassified to profit or loss.

On derecognition of a financial asset other than in its entirety (e.g. when the society retains an option to repurchase part of a transferred asset), the society allocates the previous carrying amount of the financial asset between the part it continues to recognise under continuing involvement, and the part it no longer recognises on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognised and the sum of the consideration received for the part no longer recognised and any cumulative gain/loss allocated to it that had been recognised in OCI is recognised in profit or loss. A cumulative gain/loss that had been recognised in OCI is allocated between the part that continues to be recognised and the part that is no longer recognised on the basis of the relative fair values of those parts. This does not apply for equity investments designated as measured at FVTOCI, as the cumulative gain/loss previously recognised in OCI is not subsequently reclassified to profit or loss.

Ar Fo	kopo Savings and Credit Co-operative Society Limited - CS/ Innual report and financial statements Or the year ended 31 December 2019 OTES (CONTINUED)	
1.	Significant accounting policies (continued)	
i)	Financial instruments (continued)	IFRS7.p35F
	- Financial assets (continued)	
	Write-off	IFRS7.p35F,
	Loans and debt securities are written off when the society has no reasonable expectations of recovering the financial asset (either in its entirety or a portion of it). This is the case when the society determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. A write-off constitutes a derecognition event. The society may apply enforcement activities to financial assets written off. Recoveries resulting from the society's enforcement activities will result in impairment gains.	IFRS9.p5.4.4
	- Financial liabilities	IFRS7.p35F
	The society's financial liabilities which include, and fall into the following categories:	
	- Financial liabilities at fair value through profit or loss: financial liabilities that are acquired or incurred principally for the purpose of repurchasing in the near term or upon initial recognition is part of a portfolio that has a recent pattern of short term profit taking. Such liabilities are carried at fair value and the fair value gains or losses are included in profit or loss. This category has two sub-categories:	IFRS9.p4.2.1A
	- financial assets held-for-trading and;	
	- those designated at fair value through profit or loss at inception.	
	- Financial liabilities measured at amortised cost: These include borrowings, trade and other payables, and These are initially measured at fair value and subsequently measured at amortised cost, using the effective interest rate method.	IFRS9.p4.2.1
	Any difference between the proceeds (net of transaction costs) and the redemption value is recognised as interest expense in profit or loss under finance costs under the effective interest rate method.	
	Borrowings are initially recognised at fair value, net of transaction costs incurred and are subsequently stated at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption value is recognised as interest expense in profit or loss under finance costs.	
	Fees associated with the acquisition of borrowing facilities are recognised as transaction costs of the borrowing to the extent that it is probable that some or all of the facilities will be acquired. In this case the fees are deferred until the drawn down occurs. If it is not probable that some or all of the facilities will be acquired the fees are accounted for as prepayments under trade and other receivables and amortised over the period of the facility.	
	General and specific borrowing costs directly attributable to the acquisition or construction of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially completed for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.	
	All other borrowing costs are recognised in profit or loss in the year in which they are incurred.	
	Financial liabilities are derecognised when, and only when, the society's obligations are discharged, cancelled or expired.	IFRS9.p3.3.1

i) Financial instruments (continued)

IFRS7.p35F

- Offsetting financial instruments

IFRS7.p13A

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when there is a legally enforceable right to offset the amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

IAS2.p36(a)

j) Inventories

Inventories consumables and are stated at the lower of cost and net realisable value. Cost is determined by the first-in-first-out (FIFO) basis and comprises all costs attributable to bringing the inventories to their current location and condition. Net realisable value is the estimate of the selling price in the ordinary course of business, less the selling expenses.

k) Cash and cash equivalents

IAS7.p45

For the purposes of the statement of cash flows, cash and cash equivalents comprise cash in hand, deposits held at call with banks, and financial assets with maturities of less than 3 months, net of bank overdrafts and money market lines.

Restricted cash balances are those balances that the society cannot use for working capital purposes and are reduced from cash and cash equivalents.

In the statement of financial position, bank overdrafts are included within borrowings in current liabilities.

I) Investment shares

IAS32.p18(a)

Member interest are classified as equity where the society has an unconditional right to refuse redemption of the members' shares.

IAS32.p18(a)

Provisions in the Act, regulations or the Sacco by-laws impose unconditional prohibitions on the redemption of members' shares.

m) Reserves

- Statutory reserve

Transfers are made to the statutory reserve fund at a rate of 20% net operating surplus after tax in compliance with the provision of section 47 (1& 2) of the Co-operative Societies Act, Cap 490.

- Regulatory reserve

Where impairment losses required by legislation or regulation exceed those calculated under International Financial Reporting Standards, the excess is recognised as a regulatory credit risk and accounted for as an appropriation of retained profits. These reserve is not distributable.

n) Dividends

IAS10.p12

Proposed dividends are disclosed as a separate component of equity until declared.

Dividends are recognised as a liabilities in the period in which they are approved by the society's shareholders.

1. Significant accounting policies (continued)

o) Taxation

The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in the other comprehensive income or in equity. In this case, the tax is also recognised in other comprehensive income and equity.

IAS12.p58 IAS12.p61(a)

Current tax

Current tax is provided on the results for the year, adjusted in accordance with tax legislation.

IAS12.p46

Deferred tax

Deferred tax is provided using the liability method for all temporary differences arising between the tax bases of assets and liabilities and their carrying values for financial reporting purposes. Currently enacted tax rates are used to determine deferred tax. Deferred tax assets are recognised only to the extent that it is probable that future taxable profits will be available against which temporary differences can be utilised.

IAS12.p24 IAS12.p15 IAS12.p34 IAS12.p47

For the purposes of measuring deferred tax liabilities and deferred tax asset for investment properties that are measured using fair value model, the carrying amounts of such properties are presumed to be recoverable entirely through sale unless presumption is rebutted. The presumption is rebutted when the investment property is depreciable and held within a business model whose objective is to consume substantially all its economic benefits embodied in it over time rather than through sale.

p) Accounting for leases

The society as lessee

On the commencement date of each lease (excluding leases with a term, on commencement, of 12 months or less and leases for which the underlying asset is of low value) the society recognises a right-of-use asset and a lease liability.

IFRS16.p22

The lease liability is measured at the present value of the lease payments that are not paid on that date. The lease payments include fixed payments, variable payments that depend on an index or a rate, amounts expected to be payable under residual value guarantees, and the exercise price of a purchase option if the society is reasonably certain to exercise that option. The lease payments are discounted at the interest rate implicit in the lease. If that rate cannot be readily determined, the society's incremental borrowing rate is used.

IFRS 16.p26 IFRS 16.p27

For leases that contain non-lease components, the society allocates the consideration payable to the lease and non-lease components based on their relative stand-alone components.

IFRS 16.p12

The right-of-use asset is initially measured at cost comprising the initial measurement of the lease liability, any lease payments made on or before the commencement date, any initial direct costs incurred, and an estimate of the costs of restoring the underlying asset to the condition required under the terms of the lease.

IFRS 16.p24

Subsequently the lease liability is measured at amortised cost, subject to remeasurement to reflect any reassessment, lease modifications, or revised fixed lease payments.

IFRS 16.p36

Leasehold land and buildings are subsequently carried at revalued amounts, based on annual/triennial valuations by external independent valuers, less accumulated depreciation and accumulated impairment losses. All other right-of-use assets are subsequently measured at cost less accumulated depreciation and any accumulated impairment losses, adjusted for any remeasurement of the lease liability. Depreciation is calculated using the straight-line method to write down the cost of each asset to its residual value over its estimated useful life. If ownership of the underlying asset is not expected to pass to the society at the end of the lease term, the estimated useful life would not exceed the lease term.

IFRS16.p35

1. Significant accounting policies (continued)

p) Accounting for leases (continued)

In cases where the right-of-use assets include a class of asset that is not present under property, plant and equipment, the entity must disclose the depreciation rates applicable to the assets classified under right-of-use Assets. The disclosure may be similar to the depreciation rate under the policy for property, plant and equipment.

Increases in the carrying amount arising on revaluation are recognised in other comprehensive income and accumulated in equity under the heading of revaluation surplus. Decreases that offset previous increases of the same asset are recognised in other comprehensive income. All other decreases are charged to the profit and loss account. Annually, the difference between the depreciation charge based on the revalued carrying amount of the asset charged to the profit or loss and depreciation based on the asset's original cost (excess depreciation) is transferred from retained earnings to revaluation surplus reserve.

For leases with a term, on commencement, of 12 months or less and leases for which the underlying asset is of low value, the total lease payments are recognised in profit or loss on a straight-line basis over the lease period.

The above accounting policy has been applied from 1 January 2019. Note 1 (a) sets out the equivalent policy applied in the previous year and the impact of the change in accounting policy.

The society as lessor

Leases that transfer substantially all the risks and rewards of ownership of the underlying asset to the lessee are classified as finance leases. All other leases are classified as operating leases. Payments received under operating leases are recognised as income in the profit and loss account on a straight-line basis over the lease term.

Amounts due from lessees under finance leases are recognised as receivables at the amount of the society's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the society's net investment outstanding in respect of the leases.

Assets leased to third parties under operating leases are included in property, plant and equipment in the statement of financial position.

The depreciation policy for depreciable underlying assets subject to operating leases shall be consistent with the lessor's normal depreciation policy for similar assets. A lessor shall calculate depreciation in accordance with IAS 16 and IAS 38.

q) Provisions

Provisions for restructuring costs and legal claims are recognised when the society has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and the amount has been reliably estimated. Restructuring provisions comprise lease termination penalties and employee termination payments. Provisions for future operating losses are not recognised.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligation may be small.

The amount recognised as a provision is the best estimate of the present value of expenditures expected to be incurred to settle the obligation using a pre-tax rate that reflects the current market assessments of time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as interest expense in profit or loss under finance costs.

IAS16.p39,40, 41

IFRS16.p62 IFRS16.p81

IFRS16.p95

IFRS16.p84

IAS 37.p14, 72,63

IAS 37.p24

IAS 37.p45

1. Significant accounting policies (continued)

r) Employee entitlements

The estimated monetary liability for employees' accrued annual leave entitlement at the reporting date is recognised as an expense accrual.

s) Retirement benefit obligations

Employee entitlements to long service awards are recognised when they accrue to employees. A provision is made for the estimated liability for such entitlements as a result of services rendered by employees up to the reporting date.

The society operates a defined contribution staff retirement benefit scheme for its permanent and pensionable employees. The scheme is administered by an insurance society. The society's contributions to the defined contribution retirement benefit scheme are charged to profit or loss in the year to which they relate. The society has no further payment obligations once the contributions have been paid.

IAS19. p44

OR

The society operates a defined benefit staff retirement benefit scheme for its permanent and pensionable employees. The pension costs are assessed using the projected unit credit method. Under this method, the cost of providing pensions is charged to profit or loss so as to spread the regular cost over the service lives of employees in accordance with the advice of the actuaries who carry a full valuation of the plan every three years. The retirement benefit obligation is measured as the present value of the estimated future cash outflows. Actuarial gains and losses are recognised in other comprehensive income.

IAS19.p93 IAS19.p120(a)

The society and its employees contribute to the National Social Security Fund (NSSF), a statutory defined contribution scheme registered under the NSSF Act. The society's contributions to the defined contribution scheme are charged to profit or loss in the year to which they relate.

t) Comparatives

Where necessary, comparative figures have been adjusted to conform with changes in presentation in the current year.

IAS1.p41,42

Where there is a voluntary change in accounting policies, the entity shall also disclose:

- Nature of change in the accounting policy
- Reasons for the change in the policy and how the change in the policy provides reliable and more relevant information

27. Related party transactions and balances (continued)

IAS 24 requires:

- to disclose whether related party balances are secured/unsecured and the nature of the consideration to be provided in settlement.
- the terms of the related party transactions are equivalent to those that prevail in arm's length transactions ONLY if such terms can be substantiated.
- the expense recognised during the period in respect of bad and doubtful debts due from related parties
- disclosures about the settlement of liabilities on behalf of the entity or on behalf of another party.
- Also need to explain the nature of the relationship.
- Transactions with entities owned or controlled by key management should also be disclosed. Refer to IAS 24p23

ix) Commitments and contingencies

During the year, the society provided impairment losses amounting to Shs... (2018: Shs.....) relating to related party balances carried at amortised cost.

IAS24. p17(c)

IAS24. p20(h)

28. Risk management objectives and policies

An entity need not provide a specific disclosure required by an IFRS if the information is not material.

IAS1.p31

Financial risk management

The society's activities expose it to a variety of financial risks: market risk (including interest rate risk and price risk), credit risk and liquidity risk.

IFRS7.p31

The society's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the society's financial performance.

Risk management is carried out by the risk sub-committees under policies approved by the directors. The risk sub-committee identifies, evaluates and manage financial risks in close co-operation with various departmental heads. The directors provides written principles for overall risk management, as well as written policies covering specific areas, such as liquidity risk, interest rate risk, credit risk, and investment of excess liquidity.

The sub-committee reports to the directors on all aspects of risks including nature of risks, measures instituted to mitigate risk exposures etc.

(a) Market risk

- Interest rate risk

The society's exposure to interest rate risk arises from borrowings and financial assets. Loan and advances and members deposits are fixed interest securities and therefore not susceptible to market interest rate changes.

IFRS7.p33(a) IFRS7.p33(b) IFRS7.p22(c)

Financial assets and liabilities advanced and obtained at different rates expose the society to interest rate risk. Financial assets and liabilities obtained at fixed rates expose the society to fair value interest rate risk, except where the instruments are carried at amortised cost. The society maintains adequate ratios of borrowings when compared to total borrowings in fixed interest rates.

(a) Market risk (continued)

- Price risk

A 5% sensitivity rate is being used when reporting price risk internally to key management personnel and represents managements assessment of the reasonably possible change in market rates of stock prices.

IFRS7.p41

Profit for the year would increase/decrease as a result of gains/losses on equity securities classified as FVPL. Other components of equity would increase/ decrease as a result of gains/losses on equity securities classified as FVOCI.

(b) Credit risk

IFRS7.p35A

Credit risk is the risk that a customer or counterparty will default on its contractual obligation resulting in financial loss to the society. The society's main income generating activity is lending to customers and therefore credit risk is a principal risk. Credit risk mainly arises from loans and advances to customers and other financial institutions (including related commitments to lend such as loans or credit card facilities) and investment in debt securities. The society considers all elements of credit risk exposure such as counterparty default risk, geographical risk and sector risk for risk management purposes.

Credit risk management

The society's credit committee is responsible for managing the society's credit risk by;

- Ensuring that the society has appropriate credit risk practices, including an effective system of internal control, to consistently determine adequate allowances in accordance with the society's stated policies and procedures, IFRSs and relevant supervisory guidance.
- Identifying, assessing and measuring credit risk across the society, from an individual instrument to a portfolio level.
- Creating credit policies to protect the society against the identified risks including the requirements to obtain collateral from borrowers, to perform robust ongoing credit assessment of borrowers and to continually monitor exposure against internal risk limit.
- Establishing a robust control framework regarding the authorisation structure for the approval and renewal of credit facilities.
- Developing and maintaining the society's risk grading to categories exposure according to the degree of risk of default. Risk grades are subject to regular reviews.
- Developing and maintaining the society's risk processes for measuring Expected Credit Loss including monitoring of credit risk, incorporating forward looking information and the method used to measure ECL.
- Ensuring the society has policies and procedures in place to appropriately maintain and validate models used to assess and measure ECL.
- Establishing a sound credit risk accounting assessment and measurement process that
 provides it with a strong basis for common systems, tools and data to assess credit
 risk to account for ECL. Providing advice, guidance and special skills business units to
 promote best practice in the management of credit risk.

The internal audit function performs regular audit to make sure that the established controls and procedures are adequately designed and implemented.

Significant increase in credit risk

IFRS7.p35F(a) IFRS9.p5.5.13

The society monitors all financial assets that are subject to impairment requirements to assess whether there has been a significant increase in credit risk since initial recognition. If there has been an increase in significant risk the society will measure the loss allowance based on the lifetime rather that 12 - months ECL.

28 Risk management objectives and policies (continued)

(b) Credit risk (continued)

Significant increase in credit risk (continued)

Internal credit risk rating

The Society takes on exposure to credit risk which is the risk of financial loss to the Society if a member or counterparty to a financial instrument fails to meet its contractual obligations.

Exposure to credit risk is managed through regular analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment obligations and by changing lending limits where appropriate. Exposure to credit risk is also managed in part by obtaining collateral against loans and advances in the form of registered securities over assets and guarantees from members. Credit risk in the society, is also managed through a framework of policies and procedures. Origination and approval roles are segregated.

To aid credit managers in portfolio management, regular internal risk management reports contain information on key environmental and economic trends across major portfolios, portfolio delinquency and loan impairment performance as well as information on migration across credit grades and other trends. Expected loss is the long-run average credit loss across a range of typical economic conditions. It is used in the delegation of credit approval authority and must be calculated for every transaction to determine the appropriate level of approval. To assist risk officers in monitoring the portfolio, various internal risk management reports are available on a regular basis, providing individual counterparty, counterparty society and portfolio exposure information, the status of accounts showing signs of weakness or financial deterioration and updates on credit markets.

The society's grading systems is based on the basic principles issued by the regulatory authority SASRA on the basis that the periods are largely consistent with the IFRS presumptions on stages of credit products. In addition to nominal aggregate exposure, expected loss is used in the assessment of individual exposures and for portfolio analysis.

The credit grades within society are based on a probability of default. The society structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to the nature and type of loans. The society grades its loans into five categories on the basis of the following criteria:

- (1) **Performing loans**, being loans which are well documented and performing according to contractual terms. Such loans are considered under stage 1 no significant increase in credit risk for purposes of the ECL calculation:
- (2) **Watch loans**, being loans whose principal or interest have remained un-paid for one day to thirty days or where one installment is outstanding for less than 30 days. Such loans are also classified as stage 1 for purposes of the ECL calculation:
- (3) Substandard Ioan, being loans not adequately protected by the current repayment capacity and the principal or interest have remained un-paid between thirty-one to one eighty days or where two to six installments have remained outstanding. Under this category, loans past due between 31 - 90 days (or 2-3 pending installments) are classified within in stage 2 - significant increase in credit risk for purposes of the ECL calculation. Loans aged beyond 90 days are classified as stage 3 - credit impaired;
- (4) **Doubtful loans**, being loans not adequately protected by the current repayment capacity and the principal or interest have remained un-paid between one hundred and eighty one to three hundred and sixty days or where seven to twelve installments have remained outstanding. Such loans are classified as stage 3 for purposes of the ECL calculation; and
- (5) **Loss loans**, being loans which are considered uncollectible or of such little value that their continued recognition as receivable assets is not warranted, not adequately protected and have remained un-paid for more than three hundred and sixty days or where more than twelve installments have remained outstanding. Such loans are also classified as stage 3 for purposes if the ECL calculation.

IFRS7. p35A IFRS7. p35Fa, IFRS9. p5.5.13

SSA 41.2, IFRS7. p35Ga

28. Risk management objectives and policies (continued)

(b) Credit risk (continued)

Significant increase in credit risk (continued)

Internal credit risk rating (continued)

The society analyses all data collected using statistical models and estimates the remaining lifetime PD of exposures and how these are expected to change over time. The factors taken into account in this process include macro-economic data such as GDP growth, unemployment, benchmark interest rates and house prices. The society generates a 'base case' scenario of the future direction of relevant economic variables as well as a representative range of other possible forecast scenarios. The society then uses these forecasts, which are probability-weighted, to adjust its estimates of PDs.

Loan commitments are assessed along with the category of loan the society is committed to provide, i.e. commitments to provide mortgages are assessed using similar criteria to mortgage loans, while commitments to provide a corporate loan are assessed using similar criteria to corporate loans.

The society presumes that the credit risk on a financial asset has increased significantly since initial recognition when contractual payments are more than 30 days past due unless the society has reasonable and supportable information that demonstrates otherwise.

The society has monitoring procedures in place to make sure that the criteria used to identify significant increases in credit are effective, meaning that significant increase in credit risk is identified before the exposure is defaulted or when the asset becomes 30 days past due. The society performs periodic back-testing of its ratings to consider whether the drivers of credit risk that led to default were accurately reflected in the rating in a timely manner.

Incorporation of forward-looking information

The society uses forward-looking information that is available without undue cost or effort in its assessment of significant increase of credit risk as well as in its measurement of ECL. The society's employs experts who use external and internal information to generate a 'base case' scenario of future forecast of relevant economic variables along with a representative range of other possible forecast scenarios. The external information used includes economic data and forecasts published by governmental bodies and monetary authorities.

The society applies probabilities to the forecast scenarios identified. The base case scenario is the single most-likely outcome and consists of information used by the society for strategic planning and budgeting. The society has identified and documented key drivers of credit risk and credit losses for each portfolio of financial instruments and, using a statistical analysis of historical data, has estimated relationships between macro-economic variables and credit risk and credit losses. The society has not made changes in the estimation techniques or significant assumptions made during the reporting period.

The principal macroeconomic indicators included in the economic scenarios used at 31 December 2019 for Kenya are as follows:

- GDP Growth
- Unemployment rates
- Interest rates
- Inflation
- Property price indices

Mkopo Savings and Credit Co-operative Society Limited - CS/ Annual report and financial statements For the year ended 31 December 2019
NOTES (CONTINUED)
28. Risk management objectives and policies (continued)
(b) Credit risk (continued)
Significant increase in credit risk (continued)
Incorporation of forward-looking information (continued)
Predicted relationships between the key indicators and default and loss rates on various portfolios of financial assets have been developed based on analysing historical data over the past 3 years. The society has determined that over this historical period, there has been minimal correlation between the macroeconomic factors and the experienced credit losses. Therefore these factors do not have a material impact on the ECL.

IFRS7. p35A

IFRS7. p35Fa, IFRS9. p5.5.13 IFRS7. p35G

a.b

Measurement of ECL

The key inputs used for measuring ECL are:

• probability of default (PD);

• loss given default (LGD); and

• exposure at default (EAD).

As explained above these figures are generally derived from internally developed statistical models and other historical data and they are adjusted to reflect probability-weighted forward-looking information where it may have a material impact on the ECL.

PD is an estimate of the likelihood of default over a given time horizon. It is estimated as at a point in time. The calculation is based on statistical rating models, and assessed using rating tools tailored to the various categories of counterparties and exposures. These statistical models are based on market data (where available), as well as internal data comprising both quantitative and qualitative factors. PDs are estimated considering the contractual maturities of exposures and estimated prepayment rates. The estimation is based on current conditions, adjusted to take into account estimates of future conditions that will impact PD.

LGD is an estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, taking into account cash flows from any collateral. The LGD models for secured assets consider forecasts of future collateral valuation taking into account sale discounts, time to realisation of collateral, cross-collateralisation and seniority of claim, cost of realisation of collateral and cure rates (i.e. exit from non-performing status). LGD models for unsecured assets consider time of recovery, recovery rates and the calculation is on a discounted cash flow basis, where the cash flows are discounted by the original EIR of the loan.

EAD is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, and expected drawdowns on committed facilities. The society's modelling approach for EAD reflects expected changes in the balance outstanding over the lifetime of the loan exposure that are permitted by the current contractual terms, such as amortisation profiles, early repayment or overpayment, changes in utilisation of undrawn commitments and credit mitigation actions taken before default. The society uses EAD models that reflect the characteristics of the portfolios.

28. Risk management objectives and policies (continued)

(b) Credit risk (continued)

Significant increase in credit risk (continued)

Incorporation of forward-looking information (continued)

The society measures ECL considering the risk of default over the maximum contractual period (including extension options) over which the entity is exposed to credit risk and not a longer period, even if contract extension or renewal is common business practice. However, for financial instruments such as revolving credit facilities and overdraft facilities that include both a loan and an undrawn commitment component, the society's contractual ability to demand repayment and cancel the undrawn commitment does not limit the society's exposure to credit losses to the contractual notice period. For such financial instruments the society measures ECL over the period that it is exposed to credit risk and ECL would not be mitigated by credit risk management actions, even if that period extends beyond the maximum contractual period. These financial instruments do not have a fixed term or repayment structure and have a short contractual cancellation period. However, the society does not enforce in the normal day-to-day management the contractual right to cancel these financial instruments. This is because these financial instruments are managed on a collective basis and are canceled only when the society becomes aware of an increase in credit risk at the facility level. This longer period is estimated taking into account the credit risk management actions that the society expects to take to mitigate ECL, e.g. reduction in limits or cancellation of the loan commitment.

The ECL calculation for accounting purposes is different to the provisions calculation for regulatory purposes. The society has ensured that the appropriate methodology is used when calculating ECL for both accounting purposes. The main differences between the methodologies used to measure ECL in accordance with IFRS 9 versus the ones applied for regulatory purposes are as disclosed on Note 8 of the financial statements. Any excess in regulatory provisions over IFRS 9 ECLs are accounted for as an appropriation from retained earnings into a loan loss reserve.

Groupings based on shared risks characteristics

When ECL are measured on a collective basis, the financial instruments are grouped on the basis of shared risk characteristics, such as:

- instrument type;
- credit risk grade;
- collateral type;
- remaining term to maturity;
- industry/economic sector; and
- geographic location of the borrower.

The groupings are reviewed on a regular basis to ensure that each group is comprised of homogenous exposures.

Credit quality

The credit quality of the portfolio of loans and advances (excluding commitments and guarantees) that were neither past due nor impaired can be assessed by reference to the internal rating system adopted by the sacco based on the guidelines provided by the SASRA as follow;

IFRS7. p35A

IFRS7. p35Fa, IFRS9. p5.5.13 IFRS7. p35G a,b

Ani Foi NO	opo Savings and Credit Co-operative Society Limited - CS/ nual report and financial statements the year ended 31 December 2019 TES (CONTINUED) Capital management			IAS1.p135	
	Internally imposed capital requirements				
	The society manages its capital to ensure that it will be abl while maximising the return to members through the optim balance.				
	The capital structure of the society consists of net debt calculated as sum of total borrowings and member's deposit (as shown in the statement of financial position) less cash and cash equivalents and equity (comprising investment shares, reserves and appropriation account). The directors reviews the capital structure on a semi-annual basis. As part of this review, the committee considers the cost of capital and the risks associated with each class of capital. In order to maintain the capital structure, the society may adjust the amounts of dividends paid to members or sell assets to reduce debt. The society's overall strategy remain unchanged from 2018.				
	The debt-to-capital ratios at 31 December 2019 and 2018	were as follows:
