Digital Business Transformation is Creating New Corporate Leaders

WEGALVANIZE.CO

LinkedIn's Struggle with "GRC"

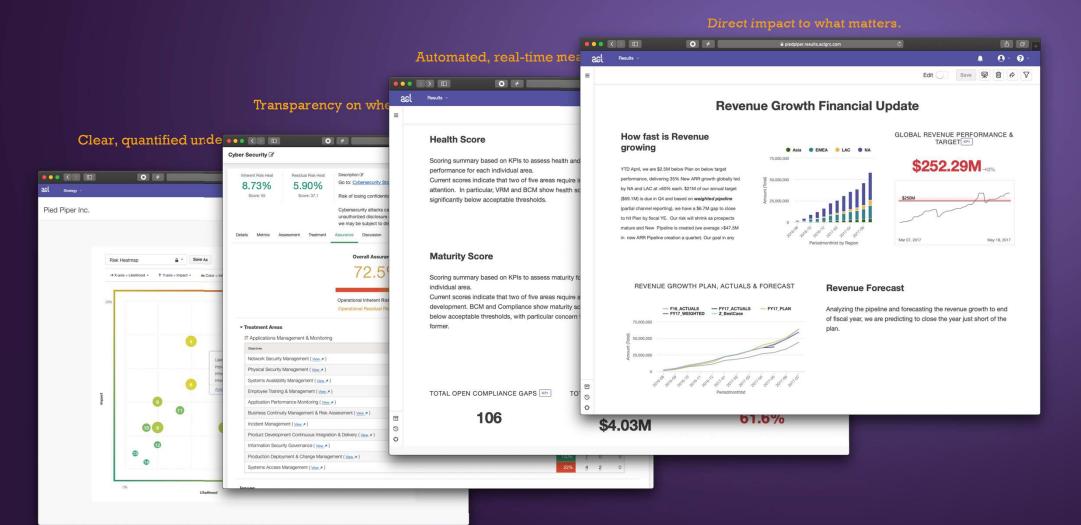

Strengthening organizations to do heroic work.

What a confident executive can see.

Management & Performance

- YOU CANNOT MANAGE WHAT YOU DO NOT MEASURE
- Credible risk management explicitly considers all risks and prioritises them
- Credible risk management creates targets for management systems
- Credible management systems generate data for management use
- Management action based upon their data
- Include review/audit capability

How do we do more with less and eliminate errors?

In the last decade more and more businesses are leveraging technology to access data and automate manual tasks which empowers their staff to focus on more value add activities

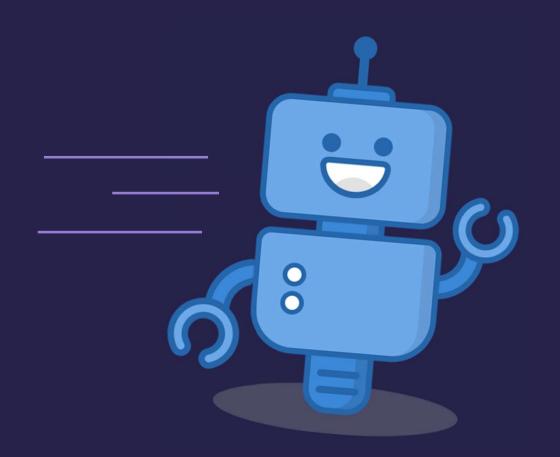

RPA?ML?AI?

Each year, Federal employees devote tens of thousands of hours to low-value compliance activities

- Mick Mulvaney-

Let's Partner together

And put the Robots to

work

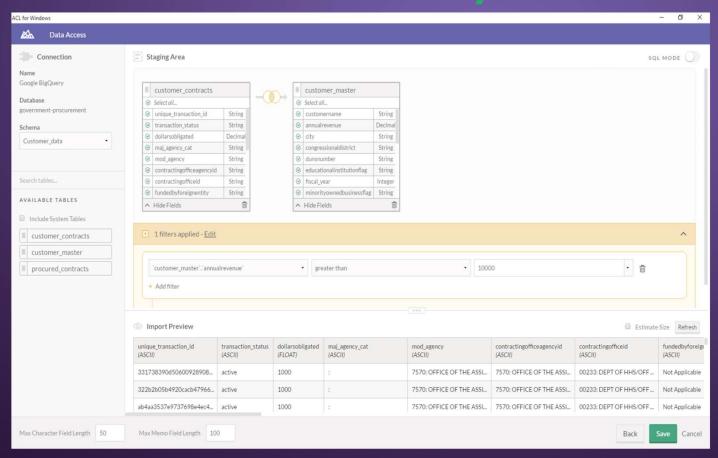

Robotic Process Automation – Intelligent Robotic Process Automation

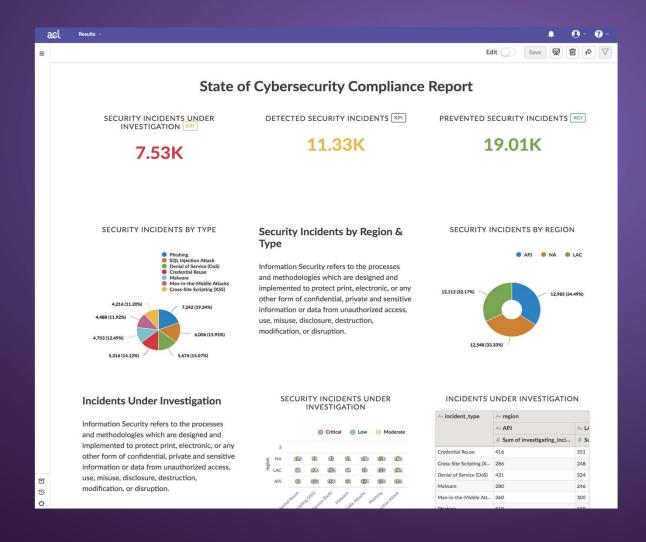

Robots can Access Data and Analyze it

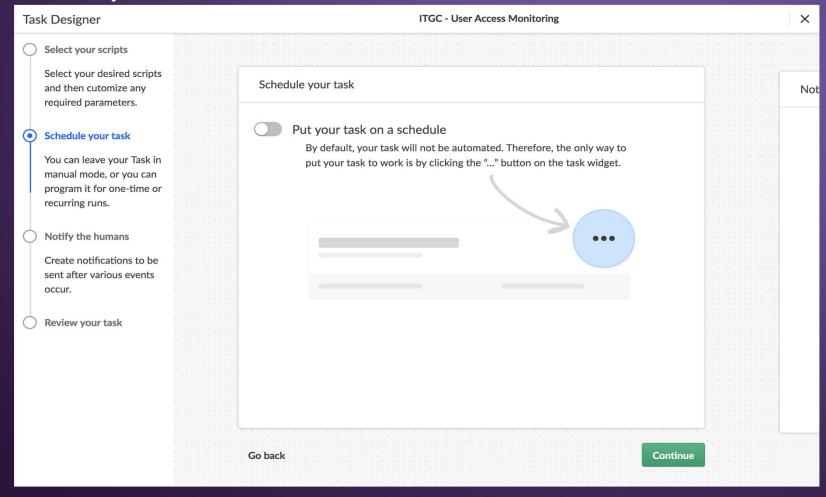

Robots can Report

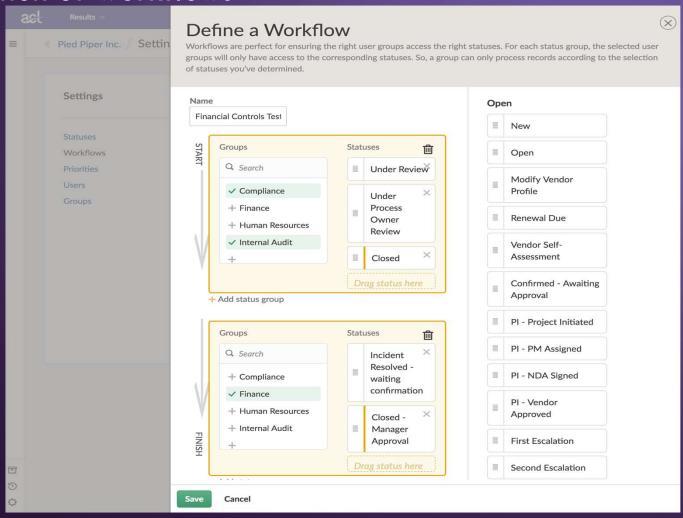

RPA – Schedule your tasks

RPA — Automation of workflows

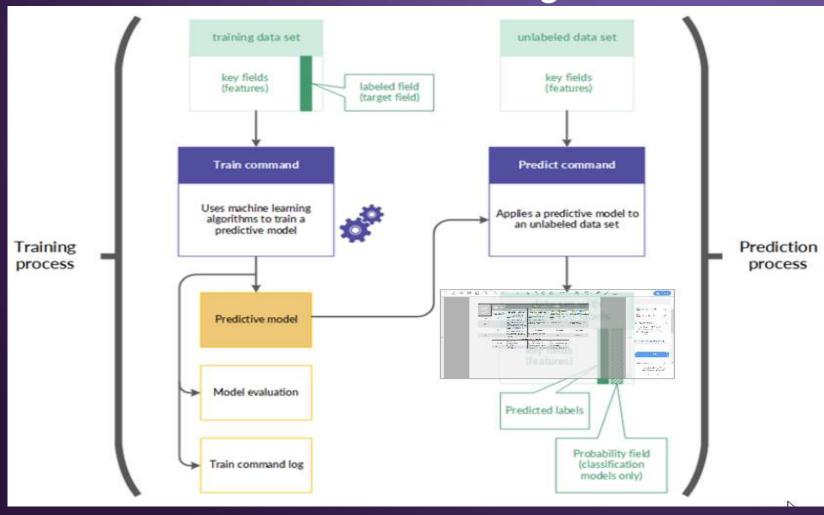

Machine learning operations

Operation	ML type	Data type	Functionality	Output
<u>Train</u>	Supervised	Character Numeric Logical	•Uses automated machine learning to create a predictive model.	•Predictive model file(*.model) •Model evaluation file(Analytics table)
<u>Predict</u>	Supervised	Character Numeric Logical	•Applies a predictive model to an unlabeled data set to predict classes or numeric values.	•Results file(Analytics table)
<u>Cluster</u>	Unsupervised	Numeric	•Groups numeric data. •Groups records based on similar, or nearby, values in one or more numeric fields.	•Results file(Analytics table)

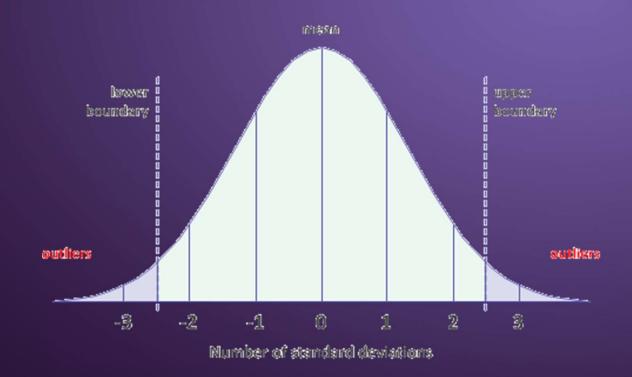

Machine Learning

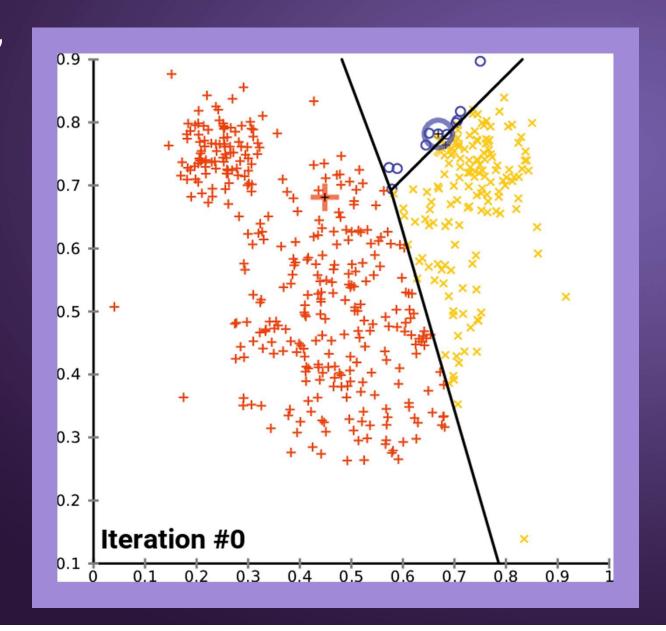

X

Outlier boundaries ±2.5 standard deviations from the mean

Values that are greater than +2.5 standard deviations from the mean, or less than -2.5 standard deviations, are included as outliers in the output results.

CLUSTERING

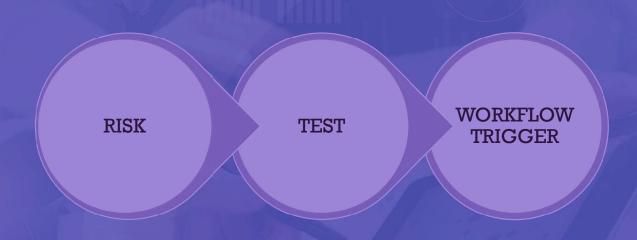

Robots add capacity to our team so we can do more with less

81%

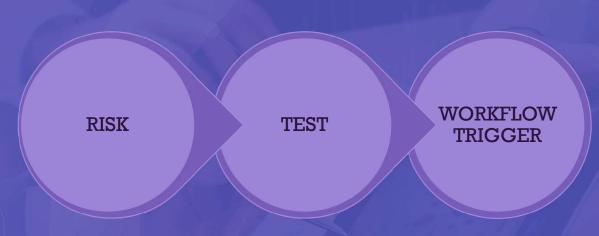

of our customers claim use of ACL has resulted in an improvement in how their department is perceived by senior management.

Risk: Improper Documentation

Test: Identify missing fields within application or file

Workflow trigger: send questionnaire to entitlement holder to provide additional information

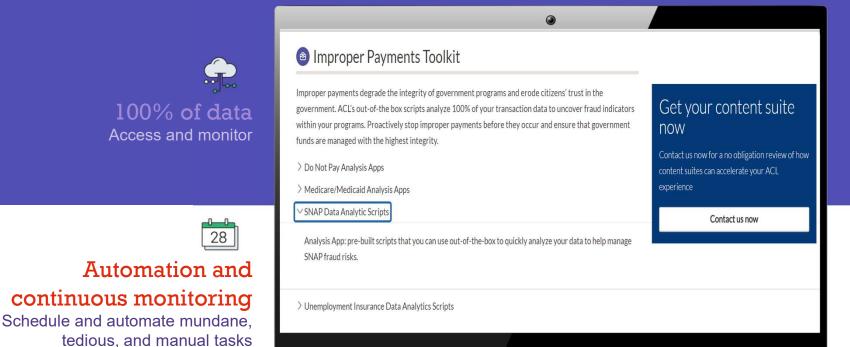

Risk: Inability to authenticate for eligibility

Test: run analytic tests to identify ineligible entitlement receivers (dead people, prisoners)

Workflow trigger: send a remediation task to appropriate parties to remove access to entitlements

Central Platform

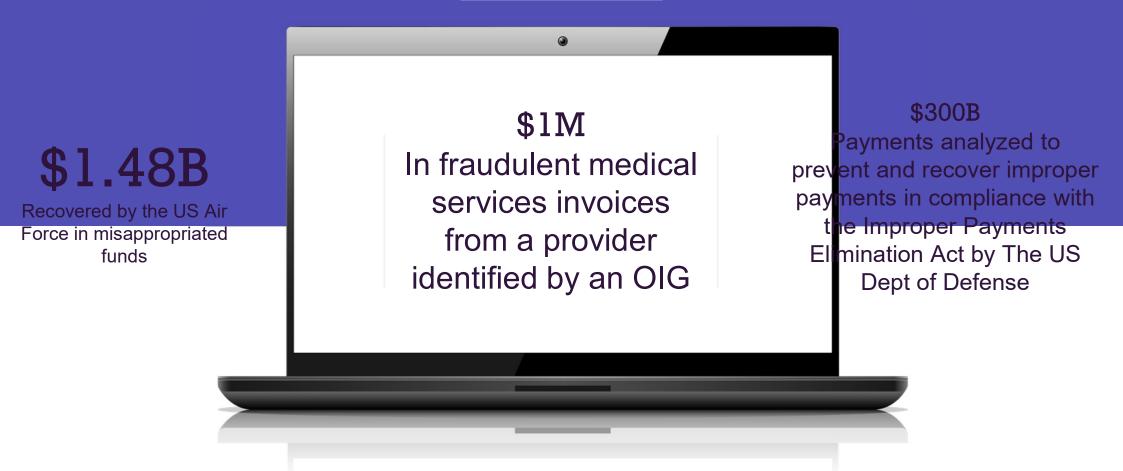

One click reporting
Better understanding of your
data by creating interactive
visualizations and storyboards

SNAP Scripts

Quickly analyze your data to help manage SNAP fraud risks

Customer ROI

0

"It would be impossible to do our work without a tool like the ACL platform. You need something to be able to pull all that data together, make connections from one database to another, to really develop those findings and you just can't do that manually."

– Ian Green, Principal Performance Auditor, Oregon Secretary of State –
